Panda Coins [7]

June 2020 - Sep 2021

Co-Founder

- Used GPC to tune and optimize scripts used by 100s of consoles daily to generate in-game tokens, resulting in a 7% increase of token production.
- Designed and implemented an efficient process that increased both the reliability as well as the productivity of the company, which led to over \$300,000 of revenue in the first year.
- Accumulated 10,000+ total followers through strategic advertising.

Canadian Tire

Nov 2018 - Sep 2020

Sales Associate

Personal Projects

Movie Predictor \square | Python + HTML + CSS

- This Movie Predictor uses Natural Language Processing and a RandomForestClassifier to provide accurate predictions for text input about the plot of the movie.
- The model was built using spaCv for NLP (lemmatization and selection of relevant parts of speech on movie synopses) and scikit-learn for other preprocessing and training of the final model.

Coin Order Tracker ☑ | JavaScript + CSS + HTML

- React app for NBA 2K MyTeam points and Madden NFL MUT coin distributors that provides a simple way to organize and track orders in the short term. Built out of self-need during my time distributing virtual coins to hundreds of frequent customers.
- Try it here

NHL Playoff Status ☑ | JavaScript + CSS + HTML

- App built to view what the current playoff status is of every NHL team. This app contains live statistics for each NHL team and calculates the exact record they need to have over the remaining games in the regular season in order to make the playoffs based off current projections.
